

# CURTAIN SYSTEMS

## SYSTEM

The WOBATECH curtain system is a modular system for a flexible room layout and workplace protection. The curtain system fulfills high demands in a wide range of applications such as blinds, room partitions, light shield or machine protection.

# SPECIFICATIONS

**Application** The curtain system allows optimal space utilization and room layout of workplaces in variable height and length in laboratory, office, school and industrial environments. Dividing rooms or workspace protection against view, glare, UV light, or light, or peripheral protection against laser light are some possible applications.

## Options for

### Curtain Installation

- Free standing room-in-room application
- Suspended, the sub-structure hangs from the ceiling
- Direct to the ceiling
- Fit to the wall
- Under a ceiling grid
