

LARGE HOUSINGS

SYSTEM

Large housings are used where equipment and workplaces must be protected, according to an economical and practical solution. They fulfill all sophisticated demands in separating production areas and protecting workplaces. For durable and safe access, WOBATECH sliding door solutions are provided, which are optimally designed for industrial applications.

SPECIFICATIONS

Application

Large housings enable the optimal use of space by creating separated and protected zones. Smooth running, horizontal or vertical access options can be chosen by customers. The system provides a large utilization of its footprint which can be optimally retrofitted with WOBATECH interior components.

Structure

- High, width, depth adjustable
- Storeys variable
- Installation of sliding doors, partitions according to installed size

Panel Elements

Standard materials

- Tempered safety glass (TSG)
- Laminated safety glass (LSG)
- HPL Solid core (Argolite ©, resistant to chemicals)

Materials on request

- Alucobond (plus/ A2)
- Coated pressboard (chipboard)
- Plywood pressboard (chipboard)
- CDF (resistant to chemicals)
- Acrylic glass (PMMA)
- Polyethylene terephthalate (PET-G) transparent
- Polycarbonate (PC)
- Metal sandwich element with rock wool
- Insulation board
- Forex white

Options for panel elements

- Standard colours: white RAL 9010 or 9016; other NCS / RAL colours on request
- Special coatings (screen printing, etching)

Installation

The installation is carried out by our installation team. The construction is based on the approved WOBATECH connection system with optional component expandability.

Fixation

Large housings are installed as room-in-room solutions or as wall, floor and ceiling installations through anchors on site.
